## Racks for DEHA Adapters

---

Racks are specially designed for mounting on EUR-pallets, so these can be easily handled with standard lifting /transport equipment.

Racks are made of seawater resistant aluminum, and each rack can hold 48 pcs. adapters, racks are designed so that these can be stacked, and intervention ensure that racks are stable during transport.

Filled rack can be lifted individually with split chains.

Rack ends are provided with a white sign with applied adapter weight class shown in different colors.

Weight for empty rack is app. 30Kg.

Weight for filled rack is app. 275Kg.
