## Stand for Lift-Tool type WE-T

---

The stand is specially designed for safe setting down and storage of the CSP Lift-Tool WE-T when not in use. The design of the stand ensures stable, safe and gentle storage.

The stand is equipped with a handlebar made of polyurethane PEHD 300 in black, thereby securing the yoke against unnecessary scratches, and the design of the handlebar makes it easy to place the yoke.

The stand is made of seawater-resistant aluminium.

Weight per stand is approx. 45 kg.

A set of racks consists of two identical racks, as shown in the picture.
