Value Engineering

Lifting equipment racks

Steel pickling racks, etc.

VE (Value-Engineering)

Value-added development, design, optimization of everything from the project stage to finished products. Scan-Pile has associated the best engineers, technicians and designers, and we only use the latest new technology, regardless of whether it concerns design, calculations or drawing material. We think unconventionally and see opportunities rather than obstacles!

Among Scan-Piles VE-tasks can the following be mentioned:

- CSP Lift-Tool with stand, Boligbeton, Hedensted-DK
- Pickling racks, transport and lifting yoke, Duferco Steel, Frederiksværk-DK
- Railings, screening, Jacobsen & Blindkilde Dalby Skole-DK
- Transport racks for concrete elements, CPT-DK

Contact us for a non-binding meeting and hear what we can offer you.
